Jackson and Josephine Counties

Community Health Assessment

A Community Health Assessment (CHA) looks at the health of people in a certain area. The CHA process includes collecting and reviewing key data from the community. The results then help health and social service providers respond to the community’s needs. This CHA is for Jackson and Josephine counties in Oregon. It was finished in 2018. Six key areas were identified:

1. Drug and alcohol use
2. Safe and affordable housing
3. Mental health
4. Poverty and jobs
5. Parenting support and life skills
6. Education and job training

This document shows results for all six key areas in Jackson and Josephine counties.

There is not enough affordable housing in the area. The high cost of housing leaves less money to pay for food, child care, health care, and more. Lack of affordable housing causes homelessness and stress. High housing costs also make it hard to hire health workers for the area.

Data Highlights

3 out of 4 people said affordable housing was a top issue affecting the community.

1 out of 5 homes have at least one severe* problem.

* Severe problems include: incomplete kitchen facilities and/or plumbing facilities, more than 1.5 people per room, or a cost burden over 50% of income.

Homes where housing costs are 30% or more of income:
- Owners: 38.9%
- Renters: 56.9%
- Owners: 42.9%
- Renters: 61.7%

Students K-12 Who Experience Homelessness:
- 2015: 3.7%
- 2016: 5.9%
- 2017: 7.6%
- 2018: 8.0%

2 times higher in our area than in the state of Oregon.
Decrease in Homeless Population

The number of people experiencing homelessness in the area has gone down in the last two (2) years. Jackson County almost fell 7%. There was a big decrease in Josephine County of about 26%.

“The rent is astronomical. You can’t even ask a landlord to make improvements because someone else is willing to pay double.” — Community Member
Mental Health

Mental health issues are common in Jackson and Josephine counties. This situation is made worse by limited access to services and the fear of asking for support. People shared that depression and anxiety were widespread across all age groups. Young people have stress due to their home life and peer pressure. Adults feel stress from money issues and raising a family. Seniors have stress due to feeling or being alone.

Data Highlights

“Mental health services are hard to come by. There are huge stigmas around services.” — Community Member

1 out of 4 adults report having a depression diagnosis in their lifetime.

3 out of 10 11th graders in the region report signs of depression.

1 out of 6 11th graders report thinking of suicide.

“Mental health among kids is a real concern. Kids are mean to each other. The amount of cruelty, bullying, violence. I see it consistently.” — Community Member

Parenting Support and Life Skills

When children experience trauma it can continue when they become adults and have their own kids. People spoke about parents not having the knowledge and skills they need. They also talked about parents’ fear of asking for support.

What are ACEs?

Adverse Childhood Experiences (ACEs) are childhood traumatic experiences. These events increase a child’s risk for poor health later on as an adult. The more ACEs a person has before the age of 18, the more likely they are to have poor health as an adult.

ACEs

Abuse
- Physical
- Emotional
- Sexual

Neglect
- Physical
- Emotional

Issues at Home:
- Divorce
- Relative in jail
- Mental illness
- Drug or alcohol abuse
- Mother was physically abused

As ACEs increase, so does the risk for poor health

RISK

0 ACEs 1 ACEs 2 ACEs 3 ACEs 4+ ACEs

Poor health can include:
- Depression
- Suicide attempts
- Severe obesity
- Diabetes
- Cancer
- Broken bones
- Smoking
- Alcoholism
- Drug use
- Stroke
- Sexually transmitted diseases (STDs)
- Chronic obstructive pulmonary disease (COPD)
- Missing work often
- Heart disease
- Not being physically active

“I really want to give my daughter a loving home, but I don’t know what that looks like.”
— Community Member

The Good News

Decrease in Child Abuse Victims

Jackson and Josephine counties have seen a big decrease in the number of child abuse victims.

The chart shows the number of child abuse victims per 100,000 people from 2015 to 2017.

- In 2015, there were 21.6 victims per 100,000 people.
- In 2016, the number decreased to 20.7.
- In 2017, it further decreased to 19.0.

The chart indicates a significant decrease over the years.
More education helps people get jobs with more pay and better benefits. The level of education and training most people have in the area does not meet the skilled labor force needs. The high cost of housing also keeps people from moving here for work. People report they are worried about:

- Low high school graduation rates.
- Limited and overloaded workers in education, social services, and health care.

### Data Highlights

**LESS THAN 40%** of children ages 3-4 are enrolled in **PRESCHOOL**

*Note:* These numbers are low compared to the state of Oregon at 43.4% and the nation at 47.5%.

**Education level is one of the biggest predictors of health. The more schooling a person has the more likely they are to live a longer and healthier life.**

4 out of 10 people age 25 and older have a high school diploma or less.

*Note:* 6 out of 10 people in our area’s Latinx population have a high school diploma or less. 5 out of 10 people in Josephine County’s Asian population have a high school diploma or less.

Community Health Improvement Plan (CHIP) 2019-2022

Overview
A person’s health is shaped by the overall health of the area they live in. Things that affect lives, jobs, relationships and available resources can also change a person’s health.

What is the All in for Health Community Health Improvement Plan (CHIP)?
The All in for Health CHIP is a set of priorities aimed at improving local health issues in Jackson and Josephine counties. It was developed from a study called the Community Health Assessment (CHA). The study results showed health needs and strengths of our area based on things like jobs, housing, and education. Information was included from over 200 existing local, regional, state, and national sources. Over 1,100 people took a survey or met in person. People were asked their views on the area’s strengths, challenges, and health concerns.

Six major themes rose to the top:
- Substance use
- Mental health and well-being
- Parenting and life skills
- Education and workforce growth
- Poverty and employment
- Affordable housing

From the CHA study, the All in for Health CHIP for 2019-2022 was made.

The plan is to work on these three (3) priorities:
- Behavioral health (mental health and substance use)
- Parenting support and life skills
- Affordable housing
2019–2022 Community Health Improvement Plan Priorities

The priority themes and goals listed here were developed with the help of more than 100 people from 60 local agencies in Jackson and Josephine counties. Local partners are working together to put in place action plans to help meet the goals.

Affordable housing

- Increase the number of people paying 30% or less of what they earn for housing.
- Increase the number of people living in homes that are safe, accessible, and are easily served by community services.

Mental health and well-being

- Lessen the effects of trauma.
- Help young people and older adults feel less alone.
- Provide the community with ways to accept and help people who need behavioral health services.
- Prevent use and misuse of substances.
- Promote ways to reduce the harm that happens with mental health and substance use issues.
- Improve access and coordination of care for people needing mental health and addiction services.

Parenting support and life skills

- Help families feel connected, cared for and strengthened.
- Help families have access to safe, affordable and quality child care.
- Increase access to food, including healthy food.
- Assure community-based organizations work together to deliver coordinated services.

What happens next?

The plan will require teamwork among health care providers, local governments, educators, non-profits, and the people who live in the area. It builds on current programs and helps bring together local resources.

How can I help?

Spread the word about the All in for Health CHIP! To learn more and get involved, contact Angela Warren, at Angela@JeffersonRegionalHealthAlliance.org or (541) 292-6466. The full CHA and CHIP can be seen at JeffersonRegionalHealthAlliance.org.
